RE: Three Year Reinspection 14-016-1580-039Y

Dear Administrator:

The Illinois Department of Public Health has received the "School Information Form" for the AHERA three-year reinspection of the above-referenced school.

The three-year reinspection report should be incorporated into the school's copy of the asbestos management plan. During on-site AHERA compliance inspections conducted by the United States Environmental Protection Agency (U.S. EPA) and Illinois Department of Public Health personnel, the plan will be reviewed for the required materials. If any item is found to be missing or deficient the school could receive a letter of non-compliance from U.S. EPA or this Department.

Thank you for your compliance, if you have any questions, please contact Kent Cook at the Division of Environmental Health, Asbestos Program, 525 West Jefferson Street, Springfield, IL 62761 or telephone 217/782-3517, for the hearing impaired only (TTY# 800/547-0466).

Sincerely,

Asbestos Program

## **RE: Required three year asbestos re-inspection**

In accordance with the Asbestos Hazard Emergency Response Act (AHERA), at least once every three years after a management plan is in effect, each Local Education Agency (LEA) shall conduct a re-inspection of all friable and non-friable known or assumed asbestos-containing building materials (ACBM) in each school building that they lease, own or otherwise use as a school building.

Each re-inspection shall be conducted by an inspector who is licensed by the IDPH (Illinois Department of Public Health) licensed Inspector and the results of the re-inspection shall be reviewed by a Management Planner who is licensed by the IDPH. The Inspector and the Management Planner shall possess current certificates of training.

The Management Planner shall recommend, in writing, the appropriate response actions and sign and date the recommendation. The inspection report, written assessment and management planner's recommendation shall be submitted to the school's designated person for inclusion in the management plan within 30 days of the re-inspection. All licensed Inspectors and Management Planners have been sent the instructions for conducting and completing three year re-inspections (see attached).

**All original inspection reports, management plans, and three year re-inspection reports shall be on file at each school building and each district office.** A complete review of these documents will be conducted during AHERA compliance inspections by United States Environmental Protection Agency (U.S. EPA) or Illinois Department of Public Health staff.

Our records indicate that a re-inspection is required for some or all of your school buildings. Enclosed are school information forms indicating each school building that will need a three year re-inspection. The last completed inspection was dated **05/15/2013**.

**Section I** contains information that the Department has on file for each building. Please check this information for accuracy. **Please complete Section II for all school buildings in your district and Section III if there are any changes in the status of the school building since the last three-year re-inspection. If the school building is considered to be asbestos free since the last three year re-inspection, please submit written verification. If the facility has went through an asbestos removal project and all asbestos-containing materials, both friable and non-friable have been removed, have the project designer submit the verification.**

Send all information to the Illinois Department of Public Health, Asbestos Abatement Program, 525 West Jefferson Street, Springfield, IL 62761 or by fax to 217/785-5897. **Do not send the three year re-inspection report to the Department, only the enclosed "School Information Form" in its entirety should be submitted.** If you have any questions, please contact the Asbestos Program at (217)782-5830 or for the hearing impaired only TTY# 800-547-0466.

Sincerely,  
Asbestos Program
